SUMMARY

I am a Software Developer, passionate about new technologies and innovations, with 4+ years experience, participating in the complete lifecycle-product structuring, development of successfully launched applications, as well as experienced in working in multicultural environments, in di" erent countries and cultures, such as in China, Spain, Armenia.

EXPERIENCE

2019~   **SOFTWARE DEVELOPER**
Brooktec (Spain, Madrid)

As a Software Developer in Brooktec my main responsibility was designing e! cient and reusable front-end solutions for di" erent web and mobile(hybrid) applications. Participating in creating data model, code reviews and finding best and quick solutions to the problems. As Brooktec is a digital agency, projects and main technologies varies from ReactJS/ReactNative , Ionic/Angular to the server side NodeJs/Rest.

2017-2019   **FRONT END DEVELOPER**
Alibaba (China, Hangzhou)

Working in Alibaba my team and I were mostly working on B2B seller center side, building seller centers for platforms such as TaoBao, Lazada, Aliexpress as well as taking a big part on development of Lazada's hybrid mobile application. I was also working on designing and building css animations for react component library called "Alibaba Fusion Design". Main technology for front end was React.js/Redux/Mapbox/ReactNative.

2016   **FRONT END DEVELOPER**
FREELANCE

As a freelancer I have been working on portfolio pages, one page applications for small services. Building easy and fast solutions . Main technologies used was jQuery, Vanilla.js , Angular, Firebase, Express.js.
